## PORTABLE CD PLAYER for CAR RADIOS and MEDIASTATIONS\* with Plug&Play installation via USB port

PORTABLE  
& Plug&Play

### Portable CD player

designed for car radios and mediastations without this function.

Plug&Play installation via USB port: no need to take the vehicle to an installer, once connected it is ready to use.

### How do I connect it?

Simply connect it to the system via the USB port on the car radio or mediastation (both standard and aftermarket) and it's up and running.

### How do I use it?

Once connected, the player is to be controlled directly from the car radio or mediastation through the usual commands Play/Pause, Next/Previous track, etc.

Just plug it  
into the USB port  
and it's ready to use!

CD-ROM  
CD-R  
CD-RW

MP3  
WMA  
WAV

NB. The car radio and/or mediastation must be activated to read MP3, WMA and WAV files.

## VM550

**PORTABLE CD  
PLAYER  
for CAR RADIOS  
and MEDIASTATIONS\*  
with Plug&Play  
installation  
via USB port**

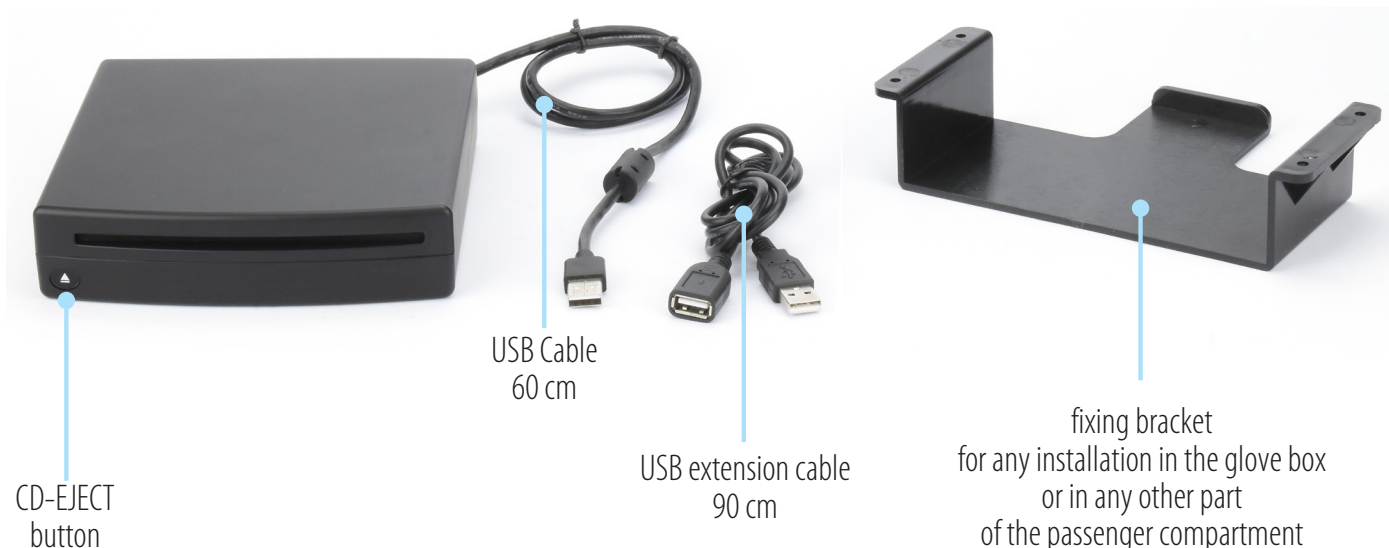

### Technical Data

- Supported CD formats: CD-ROM, CD-R and CDR-RW
- Supported audio files: MP3, WMA and WAV
- 5V power via USB 2.0 port

**\*Compatible only with MP3, WMA, WAV, enabled car radios and Mediastations with USB 2.0 multimedia port**

### Supplied

- 1 VM550 CD player
- 1 x 60 cm USB cable
- 1 x 90 cm USB extension cable
- 1 fixing bracket

### HOW TO CONNECT THE PLAYER TO THE SYSTEM

1. Connect the VM550 Player to the system with the supplied USB cable.
2. Insert a CD and wait until the player is recognised by the car radio/mediastation (approx. 20 seconds). After successful recognition, the player will automatically start playing tracks.
3. Control the player directly from the car radio/mediastation.
